Purpose

Recognising the significant value that can be derived from collaborative efforts—and with the shared goal of advancing safety and sustainability in South Africa's mining and minerals sector—the Mandela Mining Precinct and the Mine Health and Safety Council have entered into a Memorandum of Understanding (MoU).

This strategic partnership aims to strengthen collaboration and align efforts to ensure that emerging mining technologies under investigation, research, or development are fully compliant with health and safety regulations, including consideration to people effects, impacts and challenges.

The signing ceremony marks the sign-off of the MoU between the parties.
